

Fact file

**A bit about the company:**

Trac Engineering (Rail Division) supply road rail plant to rail contracting companies. We also deliver contracting opportunities in the following areas:

- Rope Access for difficult to reach areas
- De Vegetation
- Electrification – OLE Construction and Maintenance

**Where our offices are based:**

We have offices at Holmewood in Chesterfield, Eurocentral (Motherwell) and Exeter.

**How many people do we employ:**

We employ 65 people and 60 sub-contractors.

**How long have we been in the City Region:**

We have been based in the Sheffield City Region for over five years.

**Hi, my name is Lynda Gray.**

I am the Business Development Manager for Trac Engineering.

We are excited about the opportunities HS2 will bring. Team members travel to London, Birmingham or

Leeds at least three times a week, especially to key customers in London and Leeds. Improved connectivity and reduced journey times will be great for us.

Of course it won't just be us that benefit. By improving transport links to the region this will encourage other businesses to move into the area and in turn increase the value of property in the region.

During the construction of HS2, job availability will increase and skill sets will improve to meet this demand. Once HS2 has been built, there will still be plenty of job opportunities in maintenance.

There is no doubt that HS2 will benefit us and the region and is a key factor for us planning to remain in the region.
